

The finest European coolant hose you can buy without a passport.

Introducing Rein Automotive's new line of OE-quality hose for import vehicles!

You don't need to travel to Europe to find a quality source for the "holes" in your coolant hose program. Rein Automotive now offers the coverage the market's been missing. Give yourself a competitive advantage with coolant hose from Rein Automotive — look for available applications on Activant/Epicor, WHI, or ShowMeTheParts.com now!

OE DESIGN

Rein Automotive Coolant Hoses are designed to be a direct replacement for OE hoses and hose assemblies. This means, if the OE hose has multiple branches, the Rein equivalent will have the same number of branches in the correct sizes and correct locations. If the OE hose has thermoplastic "Quick Connect" fittings, the Rein Automotive hose will also have these fittings.

OE FITMENT

Rein Automotive hoses are designed to fit just like the OE hose. No more cutting hoses to fit or repurposing old "quick connect" fittings. Professional repair technicians will not have to do any additional work to a hose or hose assembly than they would if using a traditionally-sourced hose.

KEY APPLICATIONS

Rein Automotive has focused on bringing to market solutions for applications that have historically been tough to find. By filling these "holes" in aftermarket coverage, Rein is well-positioned to become your go-to source for all your coolant hose needs.

PROGRAM SIZE

The Rein Automotive Coolant Hose Program is currently 150 SKUs strong, with the majority of that number being the most in-demand item: radiator hoses. Over the next year, we expect the program to grow to 400 part numbers and cover many other types of coolant hoses found in today's European vehicles.

MAPPED APPLICATIONS

Applications for the Rein Automotive Coolant Hose Program are fully mapped and can already be found on Activant/Epicor, WHI, and ShowMeTheParts.com. What's more, every application listing is accompanied by a picture of the hose so that you can confirm it's the exact part you need.
